Statelessness Index Türkiye Country Profile

Refugee Rights Türkiye (RRT), in collaboration with the [European Network on Statelessness](#) (ENS), has developed the Türkiye Country Profile featured in the ENS's Statelessness Index.

The [Statelessness Index](#) is a comprehensive tool that compiles information related to statelessness in Council of Europe member states. It analyzes the measures taken by states to protect stateless persons and prevent statelessness, assessing their compliance with the standards set in international law. It is informed by data collected through the country-specific experts, including ENS's partner organizations.

With contributions from the RRT, Türkiye is included among the country profiles in the Statelessness Index. The Türkiye Country Profile provides detailed information on the legislation, practices, and policies concerning statelessness in Türkiye. It evaluates Türkiye's compliance with international standards on statelessness by examining its participation in relevant treaties, data collection on the stateless population, statelessness determination procedure, immigration detention practices, and measures to prevent and reduce statelessness.

You can view the [Turkey Country Profile](#) and explore the accompanying [country survey data](#).
